

Flag History

The flag history 'action' is for getting the flag history of posts. There is only one endpoint available.

GET Endpoints

List

List a set of changes to the flags on a given post by `post_id`, `user_id` or `username`

This is typically used with `post_id` to see if a post has been flagged for any reason now or in the past

Base URL is https://e621.net/post_flag_history/index.json

Parameters

- **post_id** - ID of the post to filter the flag changes by
- **user_id** - ID of the user to filter the flag changes by
- **username** - Name of the user to filter the flag changes by

Typical Response Example

```
[
  {
    id: number,
    post_id: number,
    created_at: number,
    reason: string,
    user_id: number
  },
  // ...
]
```

[Example JSON Request + Response \(https://e621.net/post_flag_history/index.json\)](https://e621.net/post_flag_history/index.json)

[Example XML Request + Response \(https://e621.net/post_flag_history/index.xml\)](https://e621.net/post_flag_history/index.xml)
