

# User Records

User records are 'affixes' that can be assigned to users. They can be found on users in the *Users* 'action' section. There is only one endpoint available for user records.

## GET Endpoints

### Show

Show a user record's information by ID

Base URL is [https://e621.net/user\\_record/show.json](https://e621.net/user_record/show.json)

#### Parameters

- **id** - ID of the user record to return

#### Typical Response Example

```
{
  body: string,
  created_at: {
    json_class: string,
    s: number,
    n: number
  },
  id: number,
  reported_by: number,
  score: number,
  user_id: number
}
```

[Example JSON Request + Response \(https://e621.net/user\\_record/show.json?id=7455\)](https://e621.net/user_record/show.json?id=7455)

[Example XML Request + Response \(https://e621.net/user\\_record/show.xml?id=7455\)](https://e621.net/user_record/show.xml?id=7455)

## POST Endpoints
