

Aliases

Aliases represent tags that are 'aliased' to other tags as they are very similar. This is not the same as a *related* tag.

e621 Has Marked this section of the API as incomplete

To get an idea of how aliases work, check out the public logs [here \(https://e621.net/tag_alias?order=date\)](https://e621.net/tag_alias?order=date).

GET Endpoints

List

List aliases by a set of given parameters
